4	I would really like rank and file teachers to weigh in on this issue. They are the ones in the trenches. Moral in APS is low. It seems like non teachers who have never been in the classroom are telling teachers how to do their job. Find out from teachers what they need and then begin to turn things around.	12/16/2016 4:16 PM

8	Especially the state government. They are out of control. I speak from personal experience as a farm and rich owner.	12/13/2016 8:41 PM

9	It's the cost of doing business and it must not cost much cause energy and food are cheaper than ever.	12/13/2016 8:41 PM
10	All this does is create more government jobs that need to be paid for by the local businesses. Ease back--I want clean--but I want businesses to want to come to NM too. The Federal and State governments have stifled business growth with all the "good" they are trying to do. They create unnecessary expenses for businesses that have never been proven to really be needed. Once again this is from my personal experience and the regulations my company came under that caused me and ultimately my customers a fortune for non proven problems that may or may not occur.	12/13/2016 7:55 PM

13	The same can be said about other industries. Federal banking laws that were written with the large national and international banks in mind are strangling the small local, regional bank systems. Federal regulations and restrictions are killing rural investment.	12/13/2016 11:08 AM
