Increasing funding for law enforcement recruitment	4
Strengthening pretrial detention requirements	5

Q14. What is your general approach to state laws and regulations affecting employer-employee relationships (such as wages, leave policies, or workplace standards)?

I oppose broad based government mandates on employers and favor private sector, market based flexibility for employer/employee relations.

Q15. Which of the following best reflects your approach to oil and gas production in New Mexico?

This is a complex issue. We need to support the oil/gas industry while also protecting the environment. I don't believe the state's current approach does this very well. We must reform our approach to the industry and support producers rather than trying to put them out of business.
